DIATHESSES

RECOGNITION	TREATMENT	ADDITIONAL INFORMATION		DATE	FREQ

Key to the 'ADDITIONAL INFORMATION' field

Elemental pattern of Treatment Rate e.g. U.W.Ti.Cu = Uranium, Tungsten, Titanium, Copper
 Numbers preceded by an 'x' are elements not identified to date.
 The terms 'Zymase', Comp. Zym (Compound Zymase) and Zymoprotein are all enzyme patterns
 These are discussed in the Level 3.4 Course - Session 2
 The R numbers refer to the 7 Rays or primary energies which influence mankind.
 Each of the Zymasases and Compound Zymasases are linked to one or more of these Rays.
 Please refer to Alice Bailey's 'The Seven Rays of Life'
 Any dates refer to when a condition was first plotted and used or transferred (post 1989).
 The frequency is the number of times used following the initial creation and use of the Condition Rate.
 Polio Vaccination - IVP = via injection (Parenteral), OVP = by mouth
